CHAITANYA AMBEKAR

Software Engineer | Java Backend Developer | Full Stack Developer

chaitnaya.a@gmail.com | +91 9309729333 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience designing and deploying scalable microservices and RESTful APIs using Java, Spring Boot, and MySQL. Hands-on expertise in AWS cloud infrastructure (EC2, S3, ALB, Auto Scaling), Kafka-based event-driven architecture, secure authentication (JWT/OAuth2), and CI/CD automation. Reduced manual engineering effort by 60% through AI-driven automation and improved API performance by 35%. Published Scopus-indexed NLP researcher with a strong foundation in OOP, system design, and design patterns.

TECHNICAL SKILLS

Languages: Java, Python, SQL, Groovy

Backend & Architecture: Spring Boot, Spring MVC, Hibernate, REST APIs, Microservices, OOP, System Design, Design Patterns (Strategy, Factory)

Frontend: Next.js, JavaScript, HTML, CSS

Cloud & DevOps: AWS (EC2, S3, ALB, Auto Scaling), Docker, Nginx, Jenkins, CI/CD Pipelines

Databases: MySQL, Schema Design, Query Optimization

Messaging & Security: Apache Kafka, Event-Driven Architecture, JWT, OAuth2, S3 Pre-Signed URLs

Payments & Integrations: Razorpay, Google Play Billing, Apple IAP, Webhooks, RTDN

RAG & AI Systems: Spring AI, RAG Pipelines, Vector DB (Qdrant), Graph DB (Neo4j)

Tools & Practices: Git, GitHub, Cloudflare R2, Agile/Scrum, Peer Code Reviews, Problem-Solving

WORK EXPERIENCE

Associate Software Engineer *Thinkhumble Creative Solutions* Oct 2024 – Present

- **API Development:** Designed and maintained secure RESTful APIs with Spring Boot, MySQL, and JWT/OAuth2 authentication, applying OOP principles and Strategy/Factory design patterns; improved response time by 35% and reduced DB load by 25%.
- **Cloud Infrastructure:** Deployed and scaled production systems on AWS EC2 with ALB and Auto Scaling (99.9% uptime); built an automated EC2 provisioning system for isolated candidate coding environments using scheduler-based audit tracking.
- **Payment Systems:** Architected a multi-provider payment platform (Razorpay, Google Play Billing, Apple IAP) handling order creation, webhooks, RTDN, subscription lifecycle, and entitlement provisioning with zero critical failures.
- **Event-Driven Architecture:** Migrated submission processing to an event-driven model using Apache Kafka, reducing processing latency by 30% and improving system scalability.
- **Secure Media Delivery:** Implemented time-limited video delivery using Amazon S3 pre-signed URLs, enabling controlled access without exposing storage credentials.
- **RAG Pipeline (Spring AI):** Built a Retrieval-Augmented Generation pipeline using Spring AI, combining vector and graph databases to power an AI-driven Knowledge Transfer Assessment system that auto-generates questions from an employee's own work history.
- **Automation & CI/CD:** Automated build, test, and deployment pipelines with Jenkins (Groovy) and integrated an AI-driven coding-problem setup system, cutting manual effort by 60%.

PROJECTS

DevMetrix — Developer Tools & Learning Platform *Next.js, Spring Boot, MySQL*

- Built a full-stack developer resource platform with an AI-powered chatbot assistant and REST APIs serving dynamic content, tech comparisons, and blog resources.

MBlogger — Media Sharing Platform *Java, Spring Boot, MySQL, Cloudflare R2*

- Developed secure REST APIs for media upload, download, and streaming, integrating Cloudflare R2 for scalable, low-latency cloud storage.

ETextile — Textile E-Commerce Platform *Java, Spring Boot, AWS, MySQL*

- Deployed a full-featured e-commerce platform on AWS EC2 with load balancing and auto-scaling, achieving 99.9% uptime under concurrent load.

Automated Media Monitoring System — Government of India (PIB) *Python, NLP, mBERT, BERT*

- Built a multilingual news classification system processing 50,000+ articles daily with 95% accuracy; findings published in a Scopus-indexed peer-reviewed journal.

EDUCATION

International Institute of Information Technology, Pune Nov 2021 – Jul 2024

Bachelor of Engineering — Computer Engineering | CGPA: 8.7

Government Polytechnic, Khamgaon Jul 2018 – Aug 2021

Diploma — Computer Engineering | Score: 94.11%

ACHIEVEMENTS

- Published a peer-reviewed, Scopus-indexed research paper on multilingual NLP-based text classification models for government news monitoring.
